

CIBMTR Opportunity

Patient Care. Research. Education. Community Engagement.

The Division of Hematology/Oncology at the Medical College of Wisconsin (MCW) and the Center for International Blood and Marrow Transplant Research (CIBMTR) seeks an Associate/Full Professor in Adult Hematopoietic Stem Cell Transplantation (HCT) to serve as a Senior Scientific Director in CIBMTR's research program. The successful candidate should have several years of experience in the clinical care of HCT patients as well as an academic reputation in HCT.

Position Highlights:

- As a CIBMTR Scientific Director, the successful candidate will be expected to devote 75% of his or her effort towards strategic, administrative and research responsibilities.
- The top priority for this position will be driving the strategic growth of the CIBMTR corporate program, providing scientific leadership and clinical support to the corporate and business operations staff of CIBMTR.
- The scientific director will partner closely with Scientific and Operational leaders on both the MCW and NMDP campuses.
- This position also plays a key role in communication with industry. An interest or evidence of expertise in collaborations with industry, pharmaceutical and biotech-funded or delivered research is not mandatory but will be favored.
- The Scientific Director will be able to pursue research in their area of expertise related to HCT and is expected to participate in all research functions of the organization.
- A history of prior work with the CIBMTR is also desirable but not required.
