CENTER FOR INTERNATIONAL BLOOD
& MARROW TRANSPLANT RESEARCH

Appendix U: Helpful Hints for Reporting Co-Existing Diseases (Conditions)

E-mail comments regarding the content of the CIBMTR Forms Instruction Manual to: CIBMTRFormsManualComments@nmdp.org. Comments will be considered for future manual updates and revisions. For questions that require an immediate response, please contact your transplant center's CIBMTR CRC.

History of Disease or Condition But No Longer Relevant

If the following conditions existed but are now corrected, they should **not** be reported under the Co-Morbid section. In addition, if any of these conditions are currently present, more detailed information would need to be provided to determine whether they are relevant to the disease being treated.

- ASD repair
- Facial weakness
- Head trauma
- HSV+
- Hydronephrosis
- Kidney stones
- Knee surgery
- Seizure (single event)
- TAH
- TB
- Traumatic brain injury
- Truncus arteriosus
- Typhilitis
- Vascular disease

More Detailed Information Needed

The following conditions would need more detailed information provided to determine whether the condition(s) are relevant to the disease being treated and what category they should be reported under.

- Abnormal inflammatory infiltrate
- ALT 65, AST 60
- Arthritis
- Behavioral issues
- Bleeding tendency
- Brain lesions
- Fevers
- Heart valve disease
- Hyper-transaminasemia
- Kidney disease
- Nutritional issues
- Pain
- Prolonged nausea and vomiting
- Shortness of Breath (SOB)

Related to Primary Disease the HCT Performed For

These items should be reported in the context of the disease itself, rather than as a co-morbid condition.

- Acquired Pure Red Cell Aplasia
- Aplastic Anemia
- Bilateral Leukemic Retinopathy
- Chromosomal Abnormalities
- Exon-2/intron-2: SBDS gene
- L Orbital Chloroma
- Multiple transfusions
- Osteosarcoma
- PNH
- Sezary Syndrome
- Sweet's Syndrome

Report Under Malignancy

All the items listed below **except for Basal Cell Cancer** should be reported on the Pre-TED (F2400) as a solid tumor under co-morbidities. On the baseline form (F2000), all the cancers listed should be reported in the appropriate malignancy category (e.g., cervical, ovarian & prostate would all be reported in the genitourinary malignancy category).

- Basal Cell Cancer (*do not report on F2400*)
- Breast Cancer
- Cervical Cancer
- Adenocarcinoma of Colon or Rectum
- Ovarian Cancer
- Prostate Cancer

Report in an Existing Category

These items should be reported under an existing category in the Co-Morbid section or another section of the form.

- Acinetobacteria infection (if requiring Abx at HCT)
- ALT 3x ULN
- Anxiety
- Ascites (probably cirrhosis)
- Aspergillosis
- Bilirubin >1.5 mg/dL
- BOOP-Ifosfamide toxicity
- Staph Infection (if required treatment at time of HCT)

Conditions That Are Not Relevant

These items are not relevant to the HCT and should **not** be reported under the Co-Morbid section.

- Acne
- Benign tumor (removed)
- Bradycardia
- Bulging discs
- Cataracts
- Irritable Bowel Syndrome (IBS)
- Kidney stones
- Knee arthritis
- Knee surgery
- Lyme disease
- Raynaud's Phenomenon
- Restless Leg Syndrome
- Rosacea
- Scoliosis
- Shingles

Conditions That Are Not Relevant (cont.)

- Concussions
- Congenital alopecia
- Deafness or hearing loss
- Fractures
- Gallbladder (stones, sludge)
- Gastric bypass surgery
- Glaucoma
- Glomerulosclerosis (assume Cr okay)
- Glucose-6-phosphate dehydrogen
- Glucose intolerance
- Gout
- Headaches (chronic)
- Hemorrhoidectomy
- Hemorrhoids
- Hernia
- Hypercholesterolemia
- Hyper-eosinophilia (if not disease related)
- Hyperlipidemia
- Hyperparathyroidism
- Hypertension
- Hypertriglyceridemia
- Hysterectomy
- Insomnia
- Iron deficiency anemia
- Iron deposition or overload
- Macular degeneration
- Malabsorption
- Malnutrition
- Meniere's disease
- Menorrhagia
- Microalbuminuria
- Migraines
- Mitral valve insufficiency
- Mitral valve prolapsed
- Mitral valve regurgitation
- NASH
- Necrotizing Fasciitis (if not requiring Abx at HCT)
- Neonatal jaundice
- Nephritis
- Nephrolithiasis
- Neuropathy
- Neurosyphilis
- Neutropenic colitis
- Osteoarthritis
- Osteomyelitis
- Osteopenia
- Pancreatitis
- Paraplegic
- Paresthesias
- Psoriasis
- Sleep Apnea
- Solitary kidney
- Spastic colon
- Splenectomy
- Syncope
- Tachycardia
- Thalassemia (minor or trait)
- Thyroidectomy
- Thyroid nodules
- Tonsillectomy
- Tracheoesophageal Fistula
- Traumatic brain injury
- Tremors
- Tubal ligation
- Uterine fibroids
- Valve regurgitation
- Vasculitis
- Vasectomy
- Vena cava filter
- Vertigo
- Vision (blindness, blurred)
- Vitamin deficiency (B12, D)
- Vitiligo
- WHIPPLE
- Wisdom tooth extraction

Manual Change History

Version Number	Date of Change	Type of Change (Add / Remove / Modify)	Description of Change
1.1	01/20/2015	Modify	Updated formatting to match CIBMTR brand standards
1.1	01/20/2015	Remove	<p>Removed the text “not being treated” from Hypertension under Conditions That Are Not Relevant:</p> <p>...</p> <ul style="list-style-type: none"> • Hypertension (not being treated) <p>...</p>
