1. Busulfan was indicated on the pre-TED as being part of the planned preparative regimen per protocol. Was IV busulfan actually given?

1 □ yes

2 □ no

Comparing what was reported on the pre-TED to the medical record, was the planned dosing conveyed accurately on the pre-TED? If not, please correct the pre-TED form (2400) in FormsNet or send a paper Error Correction form. The busulfan preparative regimen data reported on the pre-TED form and in question 2 of this form should match.

2. Specify the total prescribed cumulative dose for the preparative regimen (per protocol):

Specify units:

1 □ mg/m²

2 □ mg/kg

3. How was the busulfan administration scheduled for the regimen?

1 □ every 6 hours

2 □ daily

3 □ twice daily

4 □ other schedule

4. Specify other frequency of busulfan administration:

5. Specify planned total administration duration:

Please correct the pre-TED form (2400) in FormsNet or send a paper Error Correction form. Continue with the signature lines at question 14.
6. Were pharmacokinetics performed to determine preparative regimen drug dosing?

Comparing what was reported on the Form 2000 — Recipient Baseline Data at question 367 to the medical record, was pharmacokinetic testing conveyed accurately on the baseline form? If not, please correct the Baseline Form in FormsNet or send a paper Error Correction form.

Specify when pharmacokinetics were performed:
7. □ yes  □ no Prior to administration of the preparative regimen with a test dose
8. □ yes  □ no During administration of the preparative regimen
9. Specify the pharmacokinetic target level of busulfan: (this information can typically be found within the recipient's treatment planner, face sheet, medical record, or PK requisition form)
   1. □ concentration steady-state plasma level (Css)
   2. □ area under the plasma concentration time curve (AUC)

10. Specify the busulfan Css target level: __________ ng/mL
11. Specify the busulfan AUC target level: __________ µM x min

12. Was a plan in place to adjust the dose of IV busulfan based on the results of the pharmacokinetics? □ yes  □ no

13. Was the busulfan dose adjusted based on the pharmacokinetics? □ yes  □ no
